

# Polypipe triumphs under pressure in Bahrain

Effast Pressure System selected for new IKEA store in Bahrain

Recognised globally throughout both the industrial process market and construction industries for its market-leading range of water distribution pressure pipe systems, Effast Thermo Plastic Pipe System was selected and installed at what is set to be IKEA's biggest in the region. Outstanding performance and durability are just some of the hallmarks of Polypipe's Effast pressure pipes, and as such, the solution was selected to meet the demands of this vast development.

IKEA, Bahrain is another example where Polypipe's ability to offer globally respected solutions and extensive technical experience to support and advise on all aspects of the design and installation exceeded the standards required. Polypipe's drainage solutions have enjoyed a litany of success in the region, securing contracts with some of the most prestigious developments, with IKEA, Bahrain just the latest of these.

Having sold solutions into Bahrain for many years, Polypipe have had a number of successes in the region. Not only is Effast approved by the Bahrain local authorities, but thanks to Polypipe's large stock availability amongst our long time distribution partner, products are locally available, ensuring timely delivery of projects.

The new IKEA store in Salamabad, Bahrain has a built up area of 2,500 square feet. This immense retail development will be home to an 800-seat restaurant, grocery stores and a furniture showroom. Scheduled to complete in 2018, and IKEA's largest store in the region, only the most reliable and durable system would suffice to supply water to such a large building.

Thanks to Polypipe's Bahraini distribution partner, Moiz Trading, and their relationship

with the local contractor, the superiority of the Effast Pressure Pipe System was successfully communicated and the order secured for this exciting new project.

The versatility of the Effast range, with its ability to provide the perfect combination of fittings, ensured Polypipe were able to deliver a bespoke solution for IKEA's latest build. Flexibility, combined with the BSI Kitemark certificate that Effast products carry, gave the contractor the confidence that the Effast system would provide the best result for the client.
